

The Metropolitan Water District of Southern California

April 7, 2025 – Federal Regulatory Matrix

Agency	Issue	Summary	Potential Impacts	Regulatory Status
DHS	<u>Cyber Incident Reporting for Critical Infrastructure Act (CIRCIA) Reporting Requirements</u>	On April 4, 2024, the Cybersecurity and Infrastructure Security Agency (CISA) established a draft rule proposing reporting requirements for critical infrastructure entities that experience cybersecurity incidents. The draft rule proposes limiting reporting requirements to medium, large, and very large Community Water Systems and Publicly Owned Treatment Works (POTWs) that serve populations greater than 3,300.	The CIRCIA Reporting Requirements affect all water and wastewater agencies serving more than 3,300 customers. On July 3, 2024, ACWA submitted comments asking CISA to 1) refine the definition of “substantial cyber incident” to focus on capturing truly disruptive incidents, 2) align CISA reporting and data retention requirements with other federal cybersecurity requirements, 3) consider using the 50,000-person threshold in place of 3,300 for regulating water and wastewater operators, and 4) provide financial assistance to aid in compliance; among other comments.	Awaiting further action by CISA.
EPA	<u>Consumer Confidence Reports (CCRs)</u>	On May 24, 2024, EPA published the final revisions to the Consumer Confidence Report (CCR) regulation. The regulation requires public water systems serving 10,000 or more people to deliver CCRs twice a year, encourage modern electronic delivery options, clarify information regarding lead in drinking water, and provide translation for customers with limited English proficiency.	The biennial requirement is only for community water systems that serve 10,000 or more persons. Such systems that have a violation or action level exceedance between January 1 and June 30 of the current year, or have new Unregulated Contaminant Monitoring Rule (UCMR) results must include a 6-month update with the second report explaining any violations. As a wholesaler, Metropolitan is not required to do a CCR but provides water quality data to our member agencies twice per year to support the development of their CCRs.	The rule is effective June 2024, with the new content and delivery requirements starting in 2027.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>Fluoride</u>	In a September 24, 2024, ruling, a federal judge found that EPA is required to provide a regulatory response under the Toxic Substances Control Act (TSCA) because fluoridation of water at 0.7 parts per million (ppm) -- the level presently considered “optimal” in the United States - - poses an unreasonable risk of reduced IQ in children. The judge’s order does not dictate precisely what EPA’s regulatory response must be. On January 17, 2025, EPA appealed the lower court’s order.	California law requires water systems with 10,000 or more connections to fluoridate if funding is available. This court ruling does not require Metropolitan to change its current treatment operations. Per Metropolitan’s Board-adopted Drinking Water Fluoridation Policy, Metropolitan has adjusted the natural fluoride levels in its treated water supplies since 2007, in full compliance with federal and state drinking water regulations. It is important to note that drinking water is regulated under the Safe Drinking Water Act, and not TSCA.	Awaiting any further action by EPA and/or the California Division of Drinking Water with respect to fluoride.
EPA	<u>Maximum Contaminant Level for Perchlorate</u>	At the January 10, 2025, National Drinking Water Advisory Council (NDWAC) meeting, EPA said it is “evaluating occurrence and treatment information to inform development of regulatory options,” and is also considering “monitoring options, treatment technology, feasibility, and public notification” for any future regulation. This action is in response to a January 5, 2024, Consent Decree in the <i>NRDC v. EPA</i> case that required EPA to propose a maximum contaminant level goal (MCLG) and NPDWR for perchlorate by November 21, 2025, and publish the final MCLG and NPDWR by May 21, 2027.	Staff are working with AWWA and AMWA on pre-rulemaking comments to inform any proposed perchlorate regulation. Previously, staff have commented in support of EPA promulgating a federal perchlorate standard to protect public health and help with long-term remediation of perchlorate contamination in the Colorado River Basin.	Awaiting further action by EPA.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>Maximum Contaminant Levels for Six PFAS</u>	<p>On April 26, 2024, EPA published final drinking water standards for six (6) PFAS. EPA set individual maximum contaminant levels (MCLs) for PFOA and PFOS at 4.0 parts per trillion (ppt), and 10 ppt for PFNA, PFHxS, and GenX Chemicals. EPA will also regulate PFAS mixtures containing at least two or more PFHxS, PFNA, GenX Chemicals, and PFBS using a unitless Hazard Index of one (1). Lastly, EPA finalized health-based, non-enforceable MCLGs at 0 ppt for PFOA and PFOS and 10 ppt for PFNA, PFHxS, and GenX Chemicals.</p> <p>On June 7, 2024, AWWA and AMWA filed a Petition for Review asking a federal court to decide whether EPA acted appropriately in setting MCLs and MCLGs for six PFAS. Subsequently, several industry groups filed Petitions for Review, and NRDC and several community groups filed motions to intervene in support of EPA’s final rule. The court has set a briefing schedule, with final briefs due March 25, 2025.</p> <p>On February 7, 2025, the D.C. Circuit Court granted EPA a 60-day stay on legal challenges to review the April 2024 PFAS rule.</p>	<p>Metropolitan submitted comments on May 30, 2023, in support of regulating PFOA and PFOS in drinking water. However, staff commented that regulating the remaining PFAS is premature as these compounds did not follow the full regulatory process and may have unintended economic impacts.</p>	<p>Rule became effective on June 25, 2024, with a three-year compliance timeline from the rule's effective date.</p>

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>PFAS and CERCLA Part I</u>	<p>On May 8, 2024, EPA published its final rule designating PFOA and PFOS, including their salts and structural isomers, as hazardous substances under the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA).</p> <p>On June 10, 2024, several industry groups filed a Petition for Review, asking a federal court to decide whether EPA acted appropriately in designating PFOA and PFOS as CERCLA hazardous substances. NRDC and other groups have moved to intervene in defense of EPA’s rule. A group of passive receivers, including drinking water organizations, filed an <i>amici</i> brief explaining why EPA’s assessment of costs and benefits failed to take into account the effects on passive receivers. The court has set a briefing schedule, with final briefs due April 2, 2025.</p> <p>On February 24, 2025, the D.C. Circuit Court granted EPA a 60-day stay on legal challenges to give the new Administration time to review the May 2024 CERCLA rule.</p>	<p>Despite EPA’s April 19, 2024 “PFAS Enforcement Discretion and Settlement Policy Under CERCLA” that emphasized that EPA will not target water utilities, staff are still concerned that the final rule may encumber water utilities with potential liability under CERCLA for the disposal of water treatment residuals that may contain PFAS. Metropolitan submitted comments on November 7, 2022, to this effect and worked with ACWA, AMWA, AWWA, and WUWC on comments seeking an exemption under CERCLA for the water industry.</p>	<p>Rule is final and went into effect on July 8, 2024.</p>

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>PFAS and CERCLA Part II</u>	On April 13, 2023, EPA requested public “input and data” regarding whether to designate the precursors to PFOA and PFOS, as well as seven additional PFAS, as hazardous substances under CERCLA. The seven additional PFAS are PFBS, PFHxS, PFNA, Gen X, PFBA, PFHxA, and PFDA. The notice also requested input on regulating groups or categories of PFAS as hazardous substances.	Metropolitan submitted comments on August 3, 2023, that EPA should consider updated occurrence data and develop robust and reliable analytical methods before making any regulatory determination for the affected PFAS. In addition, staff requested that EPA explore other regulatory pathways for PFAS rather than CERCLA, as well as follow the "polluter pays" principle and make additional funding available for treatment and cleanup costs.	EPA had previously planned to propose a rule listing other PFAS as CERCLA hazardous substances in April 2025, but it now lists the date of the proposed rule as “To Be Determined.”
EPA	<u>PFAS and RCRA Part I</u>	On February 8, 2024, EPA released a proposed rule to revise the definition of “hazardous waste” under the Resource Conservation and Recovery Act (RCRA) such that PFAS can be included in corrective actions for treatment, storage, and disposal facilities (TSDFs).	On March 26, 2024, staff submitted a comment letter expressing concern that while the rule is focused on TSDFs, the rule could raise the disposal costs of PFAS-laden materials sent to TSDFs and that this was not included in the cost analysis. Staff also asked that EPA adopt formal RCRA enforcement guidance for TSDFs, such that water utilities are protected against future liability; and that EPA follow the “polluter pays” principle and/or make additional funding available for treatment and cleanup.	EPA anticipated finalizing the rule in December 2024 though there have been no further updates as to when the final rule will be released.

April 7, 2025 – Federal Regulatory Matrix

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>PFAS and RCRA Part II</u>	On February 8, 2024, EPA released a proposed rule to list nine PFAS (PFOA, PFOS, PFBS, HFPO-DA or GenX Chemicals, PFNA, PFHxS, PFDA, PFHxA, and PFBA) and their salts and isomers as “hazardous constituents” under RCRA.	On April 8, 2024, staff submitted a comment letter addressing EPA’s proposal to list nine PFAS and their salts and isomers as “hazardous constituents” under RCRA. A hazardous constituent listing is the first step towards a potential “hazardous waste” listing. If these nine PFAS were to be classified as hazardous wastes under RCRA, then they would automatically be classified as “hazardous substances” under CERCLA. Like our comments on the PFAS-CERCLA regulatory effort, Metropolitan emphasized that while we support regulating PFAS, the regulatory community needs guardrails in place (e.g., analytical methods, regulatory limits, and cleanup standards) prior to regulating these compounds. Staff also reiterated that EPA should follow the polluters pay principle.	EPA anticipates finalizing the rule in July 2025.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>Lead and Copper Rule Improvements</u>	<p>On October 30, 2024, EPA published the final Lead and Copper Rule Improvements (LCRI). The LCRI builds on the 2021 Lead and Copper Rule Revisions (LCRR) and the original Lead and Copper Rule. The final rule focuses on identifying and replacing lead service lines within 10 years; lowering the lead action level from 0.015 to 0.010 parts per million (ppm); removing the lead trigger level; improving tap sampling procedures; and improving public education and outreach materials to include renters and individuals with limited English proficiency.</p> <p>On December 13, 2024, AWWA filed a petition with the D.C. Court of Appeals challenging the LCRI. AWWA contends that the requirement that water systems must replace lead service lines on private property and owned by entities other than the systems if the systems can “access” such lines is neither feasible nor lawful. AWWA is also concerned about the impact of the final rule on water affordability.</p> <p>On February 19, 2025, the D.C. Circuit Court granted EPA a 60-day stay on legal challenges to give the new Administration time to review the December 2024 LCRI.</p>	<p>The rule will result in additional sampling at Metropolitan’s desert villages but is not applicable to Metropolitan’s large water system. Under the 2021 LCRR, water systems were required to provide an initial inventory of their lead service lines by October 16, 2024. Under the final LCRI, all water systems must submit a baseline inventory by November 1, 2027, and will be required to regularly update their inventories, create a publicly available service line replacement plan, and identify the materials of all service lines of unknown material. Staff partnered with trade associations to provide comments.</p>	<p>The final rule went into effect on December 30, 2024.</p>

Agency	Issue	Summary	Potential Impacts	Regulatory Status
EPA	<u>Waters of the United States</u>	On March 24, 2025, EPA and the U.S. Army Corps of Engineers published their intent to review and revise the definition of “waters of the United States” (WOTUS) in response to the Supreme Court’s 2023 decision in <i>Sackett v. EPA</i> . Towards this end, the agencies issued: (1) a guidance memo regarding applying the WOTUS definition; and (2) announced 6 listening sessions in late March-April 2025 and a 30-day comment period to solicit feedback from stakeholders.	In <i>Sackett v. EPA</i> , the Supreme Court found that the definition of WOTUS, which defines the scope of the Clean Water Act, only refers to “geographic[al] features that are described in ordinary parlance as ‘streams, oceans, rivers, and lakes’ ” and to adjacent wetlands that are “indistinguishable” from those bodies of water due to a continuous surface connection. Staff have previously submitted comments asking for a more inclusive definition of WOTUS during each of the three preceding Administrations (i.e., the 2015 Clean Water Rule, the 2020 Navigable Waters Protection Rule, the 2023 Rule, and the Amended 2023 Rule).	Comments are due April 23, 2025.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
USFWS	<u>Proposed Listing of Santa Ana Speckled Dace as Threatened Species</u>	On August 13, 2024, the USFWS proposed listing the Santa Ana Speckled Dace as a threatened species under the Federal Endangered Species Act (FESA) with protective regulations under Section 4(d) of the Act (“4(d) rule”). The 4d rule would include exceptions from take prohibition for forest and wildland management activities, habitat restoration and enhancement activities (including dam operations where they benefit the species), and removal of non-native species. If the USFWS finalizes this rule as proposed, FESA protections would apply. Due to the lack of sufficient data, Critical Habitat is not being designated at this time.	This fish currently occurs in isolated populations in Southern California in the headwaters of the Los Angeles, San Gabriel, Santa Ana, and San Jacinto River watersheds. Metropolitan has facilities that cross lower reaches of these streams. Listing could add additional constraints on maintenance and construction activities if the species were to migrate and/or get flushed downstream into areas with Metropolitan facilities. Presence of this listed species could also potentially affect operations of water supply facilities for local agencies. Staff evaluated the listing for potential impacts on Metropolitan. Known populations of Dace occur in very few locations near, and downstream of, Metropolitan facilities.	Awaiting further action by USFWS.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
USFWS	<u>Proposed Listing of Monarch Butterfly</u>	<p>On December 12, 2024, the USFWS proposed listing the monarch butterfly (<i>Danaus plexippus</i>) as a Threatened Species under the Federal Endangered Species Act (FESA) with protective regulations under Section 4(d) of the Act (“4d rule”). The 4d rule would include exceptions from take prohibition for activities conducted for the benefit of monarch butterflies that enhance milkweed and nectar plants within the breeding and migratory range; implementation of a comprehensive conservation plan; maintenance or improvement of monarch overwintering habitat; monarch mortality due to vehicle strikes; small-scale (250 or fewer butterflies) collection, possession, captive-rearing, and release of monarchs; scientific research; educational activities; possession of dead monarchs; and sale of captively reared monarchs.</p> <p>If the USFWS finalizes this rule as proposed, FESA protections would apply, and Critical Habitat would be designated in limited areas along the coast of California from Alameda County south to Ventura County.</p>	<p>While the proposed designated Critical Habitat for the monarch butterfly is outside of Metropolitan’s service area, there are a few known overwintering sites mapped within Metropolitan’s service area, mostly along the coast with a few locations inland in Los Angeles County. Listing could add additional constraints on maintenance and construction activities in limited areas if overwintering habitat is affected and/or if they are present and seasonal avoidance or incidental take authorization is needed.</p>	Awaiting further action by USFWS.

Agency	Issue	Summary	Potential Impacts	Regulatory Status
White House Council on Environmental Quality	<u>Repeal of National Environmental Policy Act Regulations</u>	On January 20, 2025, the President issued Executive Order 14154, “Unleashing American Energy,” directing the White House Council on Environmental Quality (CEQ) to rescind its National Environmental Policy Act (NEPA) regulations. In response, on February 25, 2025, CEQ published an interim final rule, “Removal of National Environmental Policy Act Implementing Regulations.”	The water industry believes the rescission of the NEPA rules will introduce delays and uncertainties in environmental reviews, increase litigation risk, and increase costs for critical water infrastructure projects. In light of the uncertainty created, rescinding the NEPA rules is counterproductive to the President’s stated goal of expediting permitting approvals.	Comment letters were due March 27, 2025.
